

Cyber Security Assessment Software for the Consulting Industry

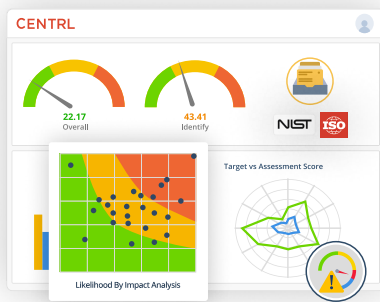

CYBER SECURITY ASSESSMENT CHALLENGE

“ Prior to adoption of CENTRL, the process for performing these operations was manual; doing the best possible within MS Office. — *Cyber Practice Leader*

We have to work around the limitations of MS Office—from its clunkiness, to its lack of real time syncing, and its limited ability to insert visuals such as heatmaps. — *Cyber Practice Manager* ”

HOW WE SOLVE IT

Automate your assessments with templates, scoring, & workflows

- ✓ Start with pre-built and pre-seeded industry assessment templates, or upload your own standard practice questionnaire
- ✓ Set up recurring assessment schedules
- ✓ Configure risk scoring methodology to your practice with support for multiple grades – Impact, Likelihood, Target Maturity, and more
- ✓ Multiple modes for assessments to suit business needs: self assessments, onsite assessments, and more

Leverage Common Controls Frameworks

- ✓ Repository of control frameworks to ensure compliance with industry best practice standards - ISO 27001, NIST 800-53, NIST Cybersecurity Framework, CSF and others
- ✓ Map controls to other frameworks and regulations, as well as your own

Dazzle your clients with dashboards and reports

- ✓ Portfolio-level dashboards and reports to gain insights, highlight risks and exceptions
- ✓ Out of the box reports to monitor key indicators like Control Maturity, Effectiveness, and risks
- ✓ Trends and benchmark reports to analyze performance of controls both over time and to deliver an impactful final presentation

A FEW OF OUR EXISTING CUSTOMERS

SCALE YOUR OPERATIONS TO SERVE MORE CLIENTS AND GENERATE MORE INCOME

Gain Efficiency

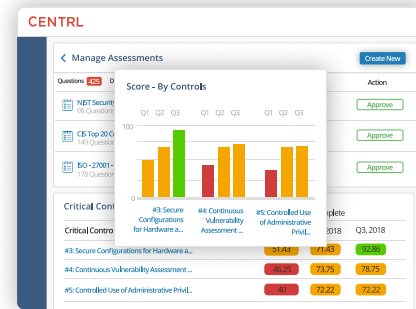

Improve quality

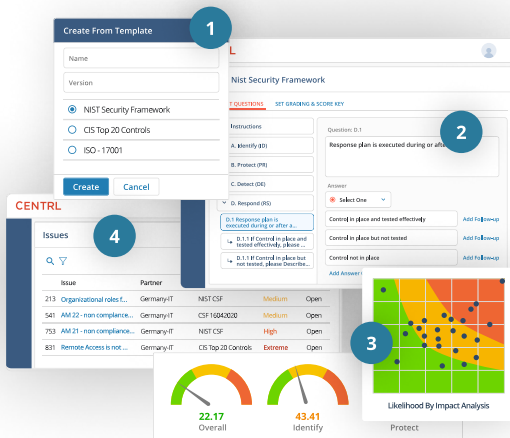

Increase revenue

Gain insights to govern your assessment operations

- Know the status of assessments across your entire client portfolio at any given time
- Out of the box reports to monitor key indicators like Control Maturity, Effectiveness, and risks, and the ability to drill down from dashboards to individual assessments to examine details
- Trends and benchmark reports to analyze performance of controls and assessment costs over time

EASY TO ADOPT, FLEXIBLE TO MEET YOUR NEEDS, AUTOMATE AND UPSSELL SERVICES

Get started quickly with templates, appropriate, dazzle, and automate and upsell over time

- Start with pre-built and pre-seeded industry assessment templates, or upload your own standard practice questionnaire
- Configure to your practice or client needs, with onsite vs. self-assessment modes, and more, and scoring support for multiple grades – Impact, Likelihood, Target Maturity, and more
- ‘Wow’ your clients with the dashboards and reports at the end of your engagement or throughout the process
- Set up recurring assessment schedules to ensure compliance overtime or upsell additional services based on issues and gaps identified through the assessment, which can also be tracked and managed to remediation through the platform

AND, NO NEED TAKE OUR WORD FOR IT

“I found myself going in and asking the consultants to verify hours entered, as what they had entered was considerably lower than the usual time required, now using CENTRL.

Jobs that normally take 50-60 staff hours of time, were coming in at 20-30 total hours,” an improvement of 33% to 50% time on projects. “Generally speaking, Cyber360 has saved us at least 20-30% time across the board.”

Kevin Brady
Sr. Manager in EisnerAmper’s PRTS Practice.

“

The tool just helps us document and follow up so much more efficiently, which in turn is bringing in more profit for the firm as we are able to serve more clients and capture more of the cyber risk assessment market

Now, with CENTRL, it’s just go fill in the information, risk rank the answers, score them, and you get an output that you can pull from to design your presentation based the output’s visuals to tell the story.”

Tyler Dwyer
Sr. Associate in EisnerAmper’s PRTS Practice.
